|  | $\mathbf{X}$ | $\mathbf{Y}$ | Not <br> attempted |  |
| :--- | :--- | :--- | :--- | :--- |
| SECTION A |  |  |  | $\mathbf{3 X}-\mathbf{Y}=$ |
| SECTION B |  |  |  | $\mathbf{3 X}=$ |
| Total score $=$ |  |  |  |  |

## SECTION B: ANSWER KEY

## CELL BIOLOGY (16 points)

35. (2 points)
(A) Answer: $\qquad$ 5 $\qquad$
(B)

| Sample | Muscular <br> dysfunction | Cardiac <br> dysfunction | Normal <br> profile |
| :---: | :--- | :--- | :--- |
| P |  |  | $\checkmark$ |
| Q | $\checkmark$ |  |  |
| R |  | $\checkmark$ |  |

36. (5 points)

| No. | Condition | Final outcome |  |  | Reason |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  | Favour <br> re-association | Not favour <br> re-association | No effect on <br> re-association |  |
| 1. | Solution with <br> high ionic <br> strength | $\checkmark$ |  | II |  |
| 2. | Temperature <br> just below <br> the melting <br> temperature | $\checkmark$ |  | I |  |

ROLL NO.

| 3. | Temperature <br> much below <br> the melting <br> temperature |  | $\checkmark$ | V |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 4. | Low <br> concentration <br> of DNA |  | $\checkmark$ | III |
| 5. | Small size of <br> fragments | $\checkmark$ |  | IV |

37. (4 points)

| Features | Processes |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Glycolysis | Kreb's cycle | Oxidative phosphorylation | Photosynthesis |
| Evolution of $\mathrm{CO}_{2}$ | X | $\checkmark$ | X | X |
| Synthesis of ATP | $\checkmark$ | $\checkmark$ | $\checkmark$ | $\checkmark$ |
| Utilization of ATP | $\checkmark$ | X | X | $\checkmark$ |
| Utilization of $\mathrm{O}_{2}$ | X | X | $\checkmark$ | X |
| Formation of NADH | $\checkmark$ | $\checkmark$ | X | X |

38. (5 points)

| Source of <br> fibroblasts | Source of <br> LDL | Expected outcome / interpretation |
| :--- | :--- | :--- |
| Normal <br> individual | Normal <br> individual | LDL is internalized by receptor-mediated <br> endocytosis |
| Normal <br> individual | Affected <br> individual | III,IV |
| Affected <br> individual | Normal <br> individual | I, II |
| Affected <br> individual | Affected <br> individual | V |

## PLANT SCIENCES (7 points)

39. (4 points)

| Features | Red algae | Green algae | Mosses | Gymnosperms | Angiosperms |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Apical <br> meristem | $\mathbf{X}$ | $\mathbf{X}$ | $\mathbf{X}$ | $\mathbf{\checkmark}$ | $\checkmark$ |
| Alternation <br> of <br> generation | $\checkmark$ | $\checkmark$ | $\checkmark$ | $\checkmark$ | $\checkmark$ |
| Double <br> fertilization | $\mathbf{X}$ | $\mathbf{X}$ | $\mathbf{X}$ | $\mathbf{X}$ | $\checkmark$ |
| Presence <br> of <br> chlorophyll <br> a and b | $\mathbf{X}$ | $\checkmark$ | $\checkmark$ | $\checkmark$ | $\checkmark$ |

40. (3 points)

Answers:
X: $\qquad$ II, VII

Y: $\qquad$ IV

Z: $\qquad$ III

## ANIMAL SCIENCES (12.5 points)

41. (2 points)

Answers:
Graph A: ___ II
Graph B: $\qquad$ III

Graph C: $\qquad$
Graph D: $\qquad$ IV
42. (2 points)

|  | Description | Yes | No |
| :--- | :--- | :---: | :---: |
| a. | Cellular dehydration | $\checkmark$ |  |
| b. | Decreased extracellular osmotic <br> pressure |  | $\checkmark$ |
| c. | Increased renal glucose reabsorption |  | $\checkmark$ |
| d. | Polyuria (excessive urine output) | $\checkmark$ |  |

43. (2 points)

| Statements | True | False |
| :---: | :---: | :---: |
| 1. Secretion of ACTH from anterior pituitary gland will be <br> high. | $\checkmark$ |  |
| 2. Adrenal glands will be enlarged. | $\checkmark$ |  |
| 3. Secretion of Corticotropin Releasing Hormone from <br> hypothalamus will be low. | $\checkmark$ |  |
| 4. Precursors for Cortical hormone synthesis will <br> accumulate and may be secreted from adrenal gland. | $\checkmark$ |  |

44. (4 points)
a. Sponge $\square$
b. Hydra $\square$
c. Octopus $\square$
d. Planarian $\square$
e. Round worm $\square$
f. Bony fish $\square$
g. Prawn

3
h. Earthworm 4
45. (2 points)

| No. | A | B |
| :--- | :--- | :--- |
| 1. | Ciliary locomotion | IV |
| 2. | Looping movements | VI |
| 3. | Alternate movements of multiple limbs | II |
| 4. | Alternate contraction circular and longitudinal muscles in the body | I |

## GENETICS \& EVOLUTION (11.5 points)

46. (2 points) Options 'a' and /or 'c' have been marked as correct.

| a. | b. | c. | d. | e. | f. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\boldsymbol{J}$ |  | $\checkmark$ |  |  |  |

47. (2 points)

Answer: $\qquad$ 32\%
48. (2 points)

Answer: $\qquad$
49. $(1+2+1+2=6$ points $)$
(A)

| a. | b. | c. | d. |
| :---: | :---: | :---: | :---: |
| $\boldsymbol{\Omega}$ |  |  |  |

(B)
(B.1) Answer: $\qquad$ 1blue:1red:2white
(B.2.) Answer: $\qquad$
(C)
White precursor $\rightarrow$ red colour $\rightarrow$ blue colour $\rightarrow$
$\qquad$ $\rightarrow$ $\qquad$ .
50. $(0.5+0.5+1+0.5+1=3.5$ points $)$
(A)

| a. | b. | c. | d. |
| :---: | :---: | :---: | :---: |
|  | $\checkmark$ |  |  |

(B)

| a. | b. | c. | d. |
| :---: | :---: | :---: | :---: |
|  | $\checkmark$ |  |  |

(C) Value of the statistic: 5.17
(D) Degrees of freedom: $\qquad$ 2
(E) Answer: 0.90

## ETHOLOGY (4.5 points)

51. (4.5 points)
(A)

| Statements | True | False |
| :---: | :---: | :---: |
| a. Larger the bivalve size, greater will be the effort to carry it to a height and hence profitability of the prey will always decrease. |  | $\checkmark$ |
| b. Smaller the size of the bivalve, easier it is to capture. Also carrying it to a height is energetically less demanding. Hence profitability of such a prey is always greater than the larger bivalve. |  | $\checkmark$ |
| c. Camouflaged bivalves will show greater profitability as compared to the non-camouflaged ones. |  | $\checkmark$ |
| d. Harder the shells of the bivalve, more will be the energy content and thus more will be the profitability. |  | $\checkmark$ |
| e. Larger bivalves will always show greater profitability provided they do not require extra efforts to break and open the shells. | $\checkmark$ |  |

(B)

| a. | b. | c. | d. |
| :---: | :---: | :---: | :---: |
|  |  | $\checkmark$ |  |

## ECOLOGY (9 points)

52. (3 points)

Realised niche of $A$

Realised niche of $C$
53. (2 points)

Answers:
1: $\qquad$

2: __A

3: __B

4: $\qquad$
54. (2 points)

Answer:

| B | C | A |
| :--- | :--- | :--- |

55. (2 points)

| Statement | 1 | 2 | 3 | 4 |
| :--- | :--- | :--- | :--- | :--- |
| Conclusion | $\checkmark$ | $\checkmark$ | $\mathbf{X}$ | $\mathbf{X}$ |

## BIOSYSTEMATICS (3.5 points)

56. (3.5 points)

*** 1 or blank (if 1 has already been written in the lowermost box).
END OF SECTION B ***********
